

New 17" Blackstone Griddle with JayPort Mounting System Option - Replacing Bumper Mount Grill Option

Behind this door latch is a 2" receiver bolted to the frame and lagged to the floor.

This powder coated steel arm fits into the 2" receiver and has tightening bolts to help with securement.

The included griddle tray then fits into the arm. The Blackstone griddle then sits on the tray. Holes have been made to help with keeping the griddle from moving. This same tray is used for the 22" griddle Eagles and Luxury is using.

An included LP quick connect hose connects to a quick connect gas line.

The table tray and griddle can also be placed into the arm sideways to face the other direction.
