# TOP 10 REASONS TO BUY A NORTHERN LITE SLIDE-IN TRUCK CAMPER

**1** Two piece fiberglass clam shell truck camper design is built like a boat with only one seam making it one of the lightest four season truck campers on the market.

**2** Northern Lite fiberglass truck campers are built with chopped fiberglass and reinforced fiberglass mat, so no additional wood or aluminum framing is required, making them 25% lighter than conventional truck campers and results in the campers not being top heavy like a conventional built truck camper.

**3** All Northern Lite slide-in truck campers come with our industry-leading six year structural warranty and are the only 5 Star rated slide-in truck camper in all of North America.

**4** All Northern Lite truck campers are built with solid plywood cabinets with solid hardwoods and paneling. No press board or photo finish panels are

used. Nine-ply Russian birch is used in all drawers with full extension roller bearing drawer glides.

**5** All models are insulated using block foam insulation on the floor, walls, and ceilings with double insulation under the cab over bed (the largest cab over bed of any fiberglass truck camper).

**6** Unlike our competition, our campers actually weigh what we say they weigh not what we wished they weighed.

**7** All jack brackets are under mounted (both front and rear) so the entire camper is lifted instead of putting all the stress on the front and back walls and made of aluminum so they won't rust.

**8** Molded design improves aerodynamics, which results in better fuel mileage and handling, as well it creates roofs corners and edges that won't leak like our competitors. High-end gel coat finish along with only one seam makes it a very easy truck camper to maintain.

**9** All Northern Lite truck campers come standard with a 100 watt solar panel and 30 amp digital solar regulator, LED lighting inside and out, thermal pane windows and skylights.

**10** Best built four season truck camper in North America, taking you places other truck campers can't go.

Northern Lite holds the distinction of producing North America's ONLY campers to achieve a

## FIVE STAR RATING

for over 15 years running in the RV Rating Book as listed by the RV Consumer Group  
P.O. Box 520, Quilcene, Washington, 98376  
[www.rv.org](http://www.rv.org)

### What is a 5-Star Rating?

According to the RV Rating Book, "To get a 5-star rating, a brand needs to have an 'excellent' record of performance in Value, Reliability and Highway Control, indicated by ratings of 90 or higher."

One of the factors in the Value rating is depreciation. A high score in this indicates less depreciation on a product over the years.

Reliability is based on used RV appraisals and letters, claims, and commentaries from customers as well as owner satisfaction polls.

Highway Control rating is based on the balance and handling of the product.

Performance also includes the manufacturer's willingness to stand behind their product.

# FACTORY TOUR

Northern Lite Campers are built using fiberglass molds in a process similar to building a fiberglass boat.

Only one seam on all Northern Lite Campers

NEW FACTORY

**STEP 1**

After a layer of Gelcoat is applied to the interior of the mold, a mixture of "chopped" fiberglass strands and a plastic resin is sprayed on top of the Gelcoat to form a very rigid, strong and light weight molded shell.

**STEP 2**

Once both the top and bottom are pulled out of the molds, the top shell is placed over the bottom shell which has a plywood lip along its top.

**STEP 3**

The top is screwed onto the bottom shell through this plywood lip. Using a metal molding, a vinyl insert is then used to cover up stainless steel screws.

**STEP 4**

The camper then proceeds to the assembly line where openings for doors, windows, and exterior compartments are cut out and assembly begins.

# FACTORY TOUR

**STEP 5**

*As the camper moves down the assembly line, cupboards, cabinets and appliances are installed and the exterior is completed.*

**STEP 6**

*At the Final Inspection station, final finishing is completed and quality and systems checks are carried out.*

**STEP 7**

*Air pressure testing is the final test before the camper leaves the assembly line.*

**STEP 8**

*Before it leaves the Northern Lite Factory, each camper is individually weighed and the actual weight is noted inside the camper.*

**STEP 9**

*The finished camper is now ready to ship to one of our over 30 Authorized Dealers throughout North America.*

# NEW LIMITED EDITION SERIES

We have taken our top of the line Special Editions to the next level. They can be ordered for a limited time in all our current sizes with both wet and dry bath and U Shape and face-to-face dinettes.
