Fleetwood Folding Camping Trailers vs. Travel Trailers

Crank Up The Fun... Without Paying at the Pump!

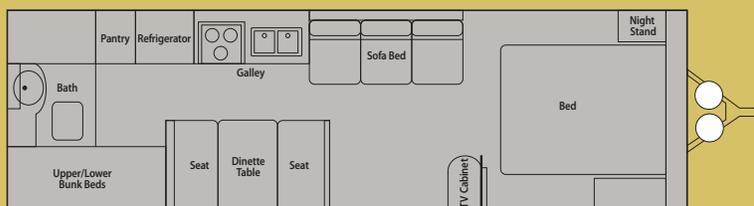

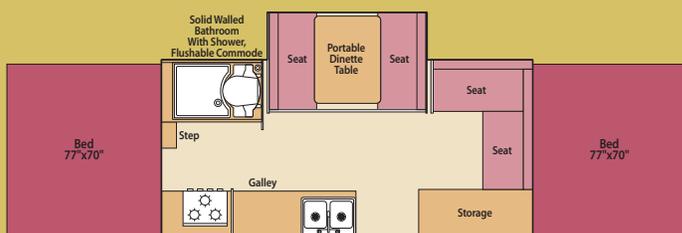

If you're like a lot of people these days, your budget has been pinched by rising fuel prices and you're probably considering more fuel efficient vehicles. But if you're thinking a smaller tow vehicle means you can't enjoy the amenities of a full featured travel trailer, think again! Fleetwood's folding camping trailers offer comparable comforts and conveniences in easy to use RVs that can be towed by smaller tow vehicles.

Facts You May Not Have Considered...

- Many communities ban residential parking of large RVs, unless they are garaged. Unlike travel trailers, many Fleetwood folding camping trailers can be garaged. Being able to store your RV in your garage will likely save you hundreds or even thousands of dollars each year in storage fees, maintenance costs, insurance premiums, and future resale value.
- Since Fleetwood folding camping trailers can be towed by smaller, more fuel efficient vehicles, you'll be saving money not just while towing, but also in everyday driving when you're not towing.
- Large tow vehicle and travel trailer combinations can be difficult and time consuming to maneuver into many campsites – especially the desirable secluded or more natural sites. Fleetwood folding camping trailers are easy to maneuver – that means less time spent setting up camp and more time taking it easy.

Compare Living Space...

Compare the Fleetwood Niagara floorplan (top) and a comparably sized travel trailer floorplan (below).

CRANK-UP THE FUN

Without Paying At The Pump!

Maximize your family's vacation fun while minimizing the pain at the pump.

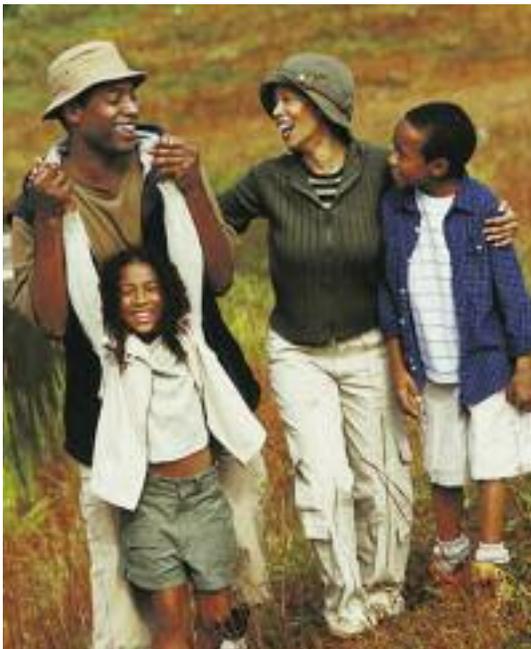

OPEN LENGTH (Approx)	UVW (Unloaded Vehicle Wt.)	FLEETWOOD FOLDING TRAILER MODELS
17 Feet	1,245 lbs. - 1,395 lbs.	Taos, Cobalt, Sedona
20-22 Feet	1,575 lbs. - 2,285 lbs.	Yuma, Sea Pine, E1, Santa Fe, Cheyenne
24-26 Feet	2,135 lbs. - 2,910 lbs.	Westlake, Sun Valley, Bayside, Utah, Williamsburg, Saratoga, E2
27 Feet	2,965 lbs. - 3,160 lbs.	E3, Niagara, Arcadia
29 Feet	3,710 lbs.	Avalon

With a Fleetwood folding camping trailer, you can dump the gas guzzler tow vehicle and enjoy the everyday savings of a more fuel efficient vehicle without compromising your active lifestyle.

Whether your lifestyle is back to the basics camping, motorsports and camping, or getting away from home with all the comforts of home, we've got an exciting and economical to own folding camping trailer that is just right for you.

Fuel Saving and Easy Towing Features of a Fleetwood Folding Camping Trailer:

- Low towing profile means less frontal and side wind resistance for greater fuel economy and easier towing.
- Efficient size to weight ratio allows use of smaller, more fuel efficient tow vehicles without giving up living space.
- Compact towing proportions provide greater all around vision and confidence when towing and maneuvering.
- Single axle (exc. Avalon) design with short rear overhang allows tighter turning radius and easier maneuvering.
- Store your trailer in your garage – eliminates storage costs and eliminates driving to and from storage facility.

The Fleetwood Reputation... A Legacy of Quality and Customer Satisfaction

We began in **1967**, engineering and building folding camping trailers in a specialized manufacturing facility in scenic Somerset, Pennsylvania. By **1979**, our products became North America's best selling folding camping trailers – a position that's never been relinquished.

In **1989**, we were acquired by Fleetwood Enterprises Inc, a leader in the RV industry, to add the best selling folding camping trailers to its existing family of leading travel trailer and motor home brands.

Combining Fleetwood's resources and our folding camping trailer innovations, Fleetwood's share of the fast growing market grew to new heights.

Today, we remain the industry leader, and now more than ever, your camping and traveling enjoyment is the focus of our mission: To provide products and services that exceed customers' expectations. While you may find less expensive folding camping trailer brands, you won't find any that combine the legacy of leadership, reputation for quality and customer satisfaction, and innovative design of Fleetwood folding camping trailers.

We know you work hard for your leisure time and you deserve the best. We're campers too, and we work hard to be the best.

A Leader In Customer Satisfaction

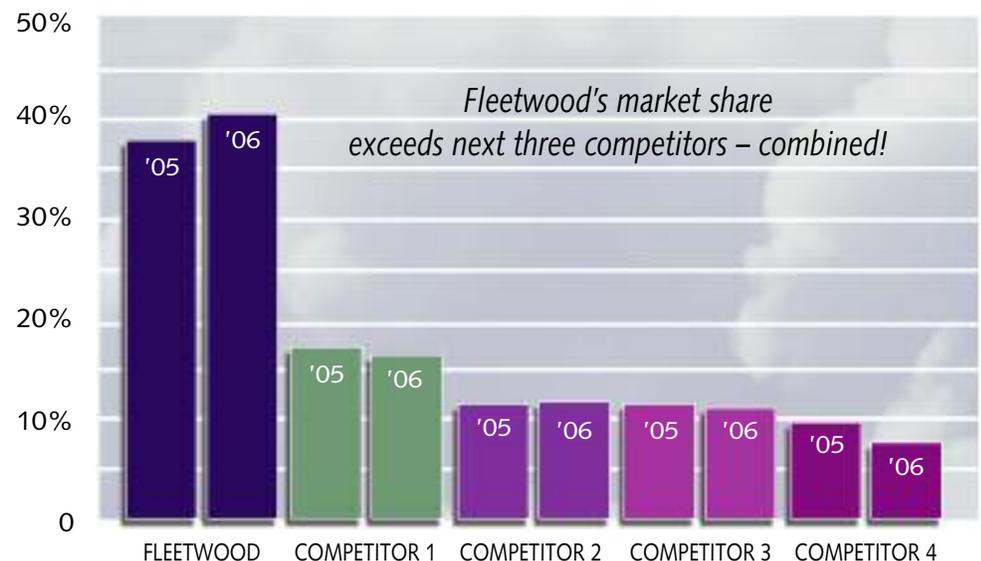

Since the inception of Fleetwood's Customer Satisfaction Index program in 1991, which is based on actual customer interviews, our specialized facility in Somerset, PA has built over a quarter million folding camping trailers, with an average positive CSI response rating of over 96%.

World Class Camping Trailers

In the 2006 and 2007 model years, we exported over 400 folding camping trailers to authorized dealers all around the world – from Iceland to Australia. Fleetwood folding camping trailers... known and trusted around the world!

More Than Ever – North America's Number One Choice*

HOW TO BE A HAPPY CAMPER

302

INSIST ON THE BEST FOR YOUR FOLDING CAMPING TRAILER AND TENTING FABRIC... FLEETWOOD AND SUNBRELLA 302®

Since you're thinking about buying a Fleetwood folding camping trailer, you clearly care about making a wise decision that you'll be happy with through the years. That's why you'll be delighted with the benefits of Fleetwood's Sunbrella 302 tenting.

Since 1992, Fleetwood has featured Sunbrella 302 woven acrylic fabric for its folding camping trailer tents. Sunbrella 302 was specially developed, exclusively for Fleetwood, meeting Federal Motor Vehicle Safety Standard 302 for flame retardancy. Plus it has all the excellent qualities of regular Sunbrella fabric – America's #1 indoor/outdoor acrylic fabric for awnings, canopies, cabanas, car tops, and casual furniture. Sunbrella is also the world's #1 marine fabric – above or below deck.

Everyone loves to spend time outside. From the oceans to the mountains, tough, long-lasting Sunbrella handles the worst Mother Nature can give. From the baking sun to the endless rain, furniture featuring Sunbrella fabric looks great in any season.

The shade is cool, and the look is hot. Whether for awnings on an ocean front condo or a poolside cabana, Sunbrella's beauty – it's ability to stand up to the elements – is why Sunbrella is the practical way to add comfortable shade.

The elements show no mercy to a boat, which is why boat owners prefer Sunbrella, the #1 marine fabric in the world.

To protect and enhance luxury yachts, sports boats, and even sports cars, Sunbrella fabrics are the smart choice.

- Because it's made of acrylic, Sunbrella 302 is unaffected by mildew and rot, making it long-lasting and far superior to cotton or canvas for outdoor use.
- Since it's woven and breathable, Sunbrella 302 won't trap heat and moisture like vinyl or coated materials. It helps keep you comfortable, and the fabric stays fresher, without collecting musty odors.
- Sunbrella 302 is solution dyed, which means its color is locked into the fibers and can't run or wash out. Since the fabric is also stain-resistant and easily cleaned, it will look great for years.
- Its UV-resistance is unsurpassed, so the fabric stands up to the sun's harsh rays. Plus it's unaffected by atmospheric chemicals.
- Sunbrella 302 is water repellent and quick drying, keeping moisture out and keeping you dry.
- The fabric is extremely strong and abrasion-resistant. Yet it's also lightweight and easy to handle.
- Sunbrella 302 won't shrink or stretch under normal use, so it will always fit perfectly.
- Sunbrella 302 won't harden, crack or peel regardless of exposure to the weather.

Fleetwood SUPERIORITY: Go ahead...COMPARE!

SUPERIOR ENTRY STEPS AND SCREEN DOOR

Fleetwood knows every trailer should have an entry step. Why do many competitors think a step should be an option?

- All models feature our extra-wide 24 1/2" one-piece door. Many competitors still use narrow and difficult to set up and use two-piece doors.
- Americana models feature our patented StepperDoor™ with lockable tool compartment.

HIGHLANDER

AMERICANA

EVOLUTION

DESTINY

SUPERIOR OUTDOOR COOKING

We know that part of enjoying the great outdoors is great food prepared outdoors. In recent years, the trend in RV outdoor cooking was the barbecue grill, but experienced campers tell us they prefer the superior versatility and efficiency of a high-pressure outdoor stove. Americana, Highlander, and Evolution (exc. Cobalt) now feature a separate high pressure outdoor stove standard. The Destiny series (exc. Taos and Sedona) features a combination indoor/outdoor low pressure stove standard.

SUPERIOR FLOOR/BED CONSTRUCTION

To provide long-term durability, we know to use only high quality one-piece Weyerhaeuser Structurwood®. Some competitors boast of using plywood, but look closely—you'll likely see voids, knotholes, and thin stapled-on splices that are prone to squeaks and separation. And some competitors want you to think floor undercoating is beneficial, but

"Weyerhaeuser agrees with Fleetwood's practice of not coating the exposed bottom surface of the Structurwood® panels used in their trailers. In our opinion, moisture from occupancy load, or from other internal or external sources may become trapped in the Structurwood® substrate if it is coated on the underside with a system that impairs the ability of the substrate to dry thoroughly. Trapped moisture, over time, may cause premature decay or rot." Weyerhaeuser

- We reinforce every bed with a full-perimeter aluminum frame and support channels, and we rate them to 1,100lbs capacity (750lbs on Taos and Cobalt).
- All Fleetwood beds feature self-storing support legs that set up easily and cannot be misplaced or lost. Look closely – most competitors use detached poles – like tent poles, they must be preassembled and stored separately.
- Our mattresses feature a comfort-engineered polyester fiber that is hypoallergenic and comfortably soft and supportive. Kick off your shoes and take a rest.
- Some competitors boast of heated mattresses. We do not believe electric mattresses are practical for the rigors of camping use.

SUPERIOR GALLEY & FURNITURE DESIGN

We know you want your camping trailer's interior to be comfortable and appealing. We also know you need it to be practical and durable. Over 40+ years of building camping trailers, we've become experts in combining these wants and needs.

- For 2008, every Fleetwood galley now features our exclusive seamless-edged countertops (exc. Taos, Sedona, and Cobalt). Look closely and you'll see a seamless surface of durable laminate that provides superior moisture resistance and long-term good looks. Americana, Highlander, and Evolution also feature this same seamless laminate on their tables and hutch tops (exc. Cobalt).
- Every Fleetwood interior features appealing yet practical surfaces that conceal minor scuffs and scrapes.
- Our Highlanders feature a permanent no-set-up-required galley. Look closely, and you'll see that unlike many competitors, we've positioned the faucet where it need not be disassembled before closing down the trailer.
- Americana and Evolution (exc. Cobalt) feature our patented Swing Level® galley that permits no-tip drawer storage in the upper cabinet. Competitors' knock-offs often don't work as well as our design.
- Destiny and Cobalt models feature a flip-over galley that, unlike most competitors, includes a bottom so the upper cabinet can remain packed with supplies.
- Americana, Highlander, and Evolution dinette seats also feature durable painted metal frames.

HIGHLANDER GALLEY

Swing Level® GALLEY

SEAMLESS COUNTERTOP

SEAT FRAME

SUPERIOR CONFIDENCE OF BRAKES ON EVERY TRAILER

We know that being able to stop a trailer is just as important as being able to tow it, so every trailer we make features electric trailer brakes – standard. Why do many competitors think brakes should be optional?

- Fleetwood uses only five-bolt wheels. Some competitors still use four-bolt wheels.
- We use only EZ Lube axles that permit easy maintenance.
- We use only slipper leaf spring suspensions because they distribute axle forces over a larger frame area and provide trouble-free reliability.

FLEETWOOD

FLEETWOOD

COMPARE

These photos are for illustration purposes only. They depict demonstrations conducted by an independent testing and research laboratory and illustrate a result of applying a 10,000lb force to a tubular frame member mounted leaf spring and axle used by Fleetwood, and a C channel frame member mounted torsion axle similar to many competitors.

SUPERIOR LIFT SYSTEM

We know that a folding camping trailer's lift system must survive exposure to elements. That's why our lift posts are clearly visible, because they're clearly superior. Try to find our competitors' lift posts – they're concealed behind awkward tent flaps to keep them out of sight and hopefully out of the elements.

- We manufacture our own high quality stainless steel posts and use aircraft grade stainless steel cables. Competitors' lift posts are just plated steel tubes with springs inside – which means they can rust if left exposed to the elements.
- Fleetwood lift posts divert rainwater harmlessly to the ground. Competitors' lift posts channel rainwater to the springs, which can then rust.
- The Fleetwood lift system is user friendly, with no need for a warning cable. When raising their roofs, most competitors require you to visually monitor a warning cable to avoid the serious damage that can be caused by over-cranking their lift system.
- The Fleetwood lift system is dependable and requires no safety posts. After raising their roofs, many competitors require you to install safety posts.
- Fleetwood engineers and builds its proprietary lift system, with independent cables for each lift post. Many competitors use outsourced lift systems that rely on a single master cable to operate their system. Damage this one cable, and your camper cannot be used.
- Fleetwood's Posi-Lock feature allows you to stop and start cranking without fear of kick-back or free-fall.

FLEETWOOD

COMPARE

SUPERIOR ROOF CONSTRUCTION

We know the true measure of a camping trailer roof is its ability to provide everyday peace of mind – whether the trailer is being used or being stored out of doors and unattended. No other folding camping trailer manufacturer has built more or knows more about camping trailer roofs than Fleetwood.

- Americana, Highlander, and Evolution (exc. Cobalt) series roofs feature a cambered, one-piece front to rear fiberglass skin, and full-length aluminum rails that integrate our exclusive roof rack tracks.
- Destiny roofs feature an aluminum skin folded along all four edges for added strength without side seams. This roof has approximately half the horizontal seam length of most competitive roofs.
- Look closely at competitors' roofs...they say they're seamless – but they clearly aren't.
- We do not compromise the integrity of our roofs with a vent because we know the plastic dome and the additional screws and caulking are potential sources of leaks and damage when not properly maintained – especially during off-season storage.

FLEETWOOD

COMPARE

TWO SEAMS

SUPERIOR STRUCTURAL INTEGRITY

COMPARE

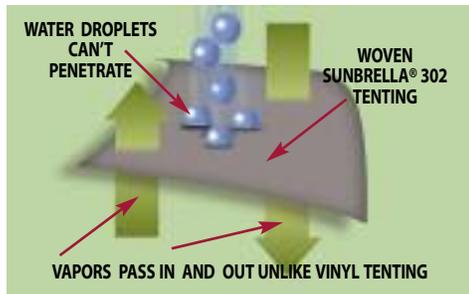

FLEETWOOD

FLEETWOOD

SUPERIOR SUNBRELLA 302® TENTING

We know a folding camping trailer's tent is comparable to foul weather outerwear – like a mountain climber's parka. That's why our tents feature high performance qualities like inherent water repellency, breathable comfort, and durability. Fleetwood has used Sunbrella 302® woven acrylic tent fabric since 1992, and Sunbrella® is the world's

number one selling marine fabric. Because it's woven, Sunbrella breathes, so it doesn't trap heat and moisture like vinyl. Look closely at competitors' tents and you'll see they use unbreathable vinyl coated fabric. Maybe that's why they use roof vents – a potential source of leaks when not properly maintained – especially during outdoor storage. And some competitors even use old-fashioned canvas behind their window screens for breathability. There is no canvas in a Fleetwood tent.

- Sunbrella 302®, is formulated to meet or exceed all FMVSS302 federal standards for flammability.
- Sunbrella 302® is inherently water resistant and requires no periodic treatments.
- Sunbrella 302® resists mildew, dry rot, fading and cracking, and is hypoallergenic.
- Our tents are sectionalized for easier and less costly repair or replacement.
- For easy cleaning, we use vinyl coated fabrics only where dirt is likely to accumulate.

We know camping trailers get towed over rough roads, and require a flexible yet strong metal structure – like a bridge or airplane. That's why only Fleetwood uses a proprietary superstructure that combines a heavy duty tubular steel chassis, thick aluminum upper body rails, up to eleven steel bulkheads, and riveted exterior body panels. And our interior walls are designed to “float”, which allows trailer flex without risk of the interior furniture pulling loose. Most competitors use a lighter duty C channel chassis, thin aluminum rails, and laminated sidewalls assembled with glue, screws and staples – no way to build an over-the-road trailer.

- All models feature galvanized steel body panels riveted to the trailer's aluminum and steel structure.
- Destiny, Americana, and Highlander steel body panels feature the durable Krystal Kote® finish for a smooth automotive appearance.
- Evolution steel body panels are deeply textured for added strength and the ability to conceal nicks and dents.
- Americana series front and rear body panels are thermoformed of impact resistant TPO.
- Destiny, Highlander, and Evolution bodies feature brightly polished diamond plate accents.
- Americana models with storage boxes feature our proprietary seamless storage box that can be hosed out and drained with no damage to the trailer. Most competitors rely on wooden storage boxes.

Standard on All Models

Unless Noted

- Posi-Lock Lift System
- Stainless Steel Lift Posts and Cables
- Electric Brakes
- Tubular Steel Frame with Bumper
- Slipper Leaf Spring Suspension
- Galvanized Steel Body Panels
- Full Perimeter Aluminum Body and Bed Rails
- Seamless Edged Galley Countertops (exc. Taos, Cobalt, and Sedona)
- Metal Framed Dinette Seats (exc. Destiny)
- Durable Roof Construction with A/C Prep (Install kits req'd)
- One-Piece Structurwood® Floor and Beds
- Positive Locking Safety Chains
- EZ Lube Axle
- Five-Bolt Wheels
- Entry Step
- Beds Rated to 1,100lbs (750lbs on Taos and Cobalt)
- CO Detector / Alarm
- Propane Detector / Alarm
- Fire Extinguisher
- Sectionalized Breathable Sunbrella 302® Tenting
- 3-Way Refrigerator (exc. Taos and Cobalt)
- Full Storage Upper Galley
- Wide One-Piece Screen Door
- Crank-Down Stabilizer Jacks
- Spare Tire, Vinyl Cover, Lug Wrench
- Power Converter / Charger
- 12V Interior Lighting
- 12V Water Pump (exc. Taos and Cobalt)
- 12V Exterior Patio Light
- 110V Outlets Interior & Exterior
- Carry-Out Free-Standing Dining Table (exc. Sedona)
- High pressure outdoor stove on Highlander, Americana, and Evolution (exc. Cobalt). Inside/Outside stove on Destiny (exc. Taos and Sedona)
- Propane Tank(s) & Vinyl Cover(s)
- Attached Bed Support Legs
- Attached Dolly Jack
- Worry-Free Shut-Off for Interior Lights
- Clear Windows with Fine Mesh Screening
- Lined Window Curtains and Bed Privacy Curtains
- Comfortable Mattresses

Cobalt Standard Features

- Sporty, Compact Dimensions for Easy Towing Behind Smaller Tow Vehicles
- Wide Profile Tires on Steel Rims
- Battery Mount
- Black and Silver Interior
- Black and Silver Exterior
- Powder Coated Body Reinforcements
- Molded Impact Resistant Wheel Well Extensions
- Stainless Steel Sink
- 5 Gal Portable Fresh Water Holding Tank
- Waterproof, all Metal Galley Cabinet
- Diamond Embossed Front Body Panel
- Steel Rimmed and Recessed Rear Lights

HIGHLANDER SERIES

NEW STANDARD FEATURES FOR 2008

- Durable Krystal Kote® finish body panels for a smooth automotive appearance

2008 Fleetwood HIGHLANDER, AMERICANA, DESTINY, EVOLUTION SERIES

HIGHLANDER SERIES

- GVWR (Gross Vehicle Weight Rating) is the maximum permissible weight of this trailer when fully loaded. It includes all weight at the trailer axle(s) and tongue or pin.
- All dry weights are based on the standard model and do not include optional accessories.
- Maximum Carrying Capacity is determined by subtracting Gross Dry Weight from the GVWR. The Maximum Carry Capacity does NOT include the weight of fresh water, propane, or water in the water heater.
- Trailer open width includes slide-out step and/or slide-out.
- Water weight equals 8.3 lbs. per gallon. Propane Gas weight equals 4.2 lbs. per gallon.
- Hitch weights are dependent upon how the trailer is equipped with accessories, on board cargo and tank fluid levels. Actual hitch weights may be higher or lower than shown. It is recommended that the tow vehicle and hitch for your trailer have sufficient capacity to accommodate actual usage.

- Some accessories may be dealer installed.
- Installed accessory weights will decrease the cargo carrying capacity. Consult Owner's Manual for accessory weights.
- Storage trunk models equipped with hot water have reduced cargo capacity because of hot water heater location.
- Refrigerator, furnace, cassette toilet, hot water and outside shower are factory installed accessories.

Or visit www.fleetwoodrv.com/owners_clubs/ to learn more.

LEARN MORE To learn more about Fleetwood Folding Camping Trailers, please visit your local dealer as indicated below or visit us at www.fleetwoodcampingtrailers.com. To learn more about Fleetwood's entire family of Recreation Vehicles, please visit: www.fleetwoodrv.com.

FIND A DEALER To find a Fleetwood Folding Camping Trailer dealer near you, visit www.fleetwoodcampingtrailers.com, or call 1-800-444-4905. You can also write to us at: Fleetwood Folding Trailers, Inc., 258 Beacon Street, PO Box 111, Somerset, Pa 15501-0111.

To Our Customers...

To make sure that you get the maximum satisfaction out of your recreational vehicle purchase, there are several things you should know:

1. Learn all you can about the folding camping trailer you're planning to buy. Don't rely on word of mouth. Get the facts about the actual trailer length, width, unloaded weight with options, Gross Vehicle Weight Rating, and cargo carrying capacity. These are available in the manufacturer's sales literature or from the Cargo Carrying Capacity Label located in each trailer. Be sure to check this information before you decide which unit to buy.
2. Verify the towing capacity of your tow vehicle. If you don't know, or aren't sure, you can ask at your automotive dealership. Be sure to match its tow rating to the loaded (not dry) weight of your trailer. Include the weight of water, additional accessories, clothing, food, and gear. To help Fleetwood folding camping trailer customers estimate this total weight, our Gross Vehicle Weight Ratings reflect the maximum weight of the trailer when fully loaded for camping. Be sure the weight of the tow vehicle plus the weight of your trailer do not exceed the Gross Combined Weight Rating of the tow vehicle.

Taking these simple steps before you buy will help ensure that your trailer and tow vehicle combination is just what you wanted.

Happy Camping!

IMPORTANT-PLEASE READ Product information, photography and illustrations included in this publication were as accurate as possible at the time of printing. For further product information and changes, please visit our website at: www.fleetwoodcampingtrailers.com or contact your local Fleetwood dealer. Prices, materials, design and specifications are subject to change without notice. All weights, fuel, liquid capacities and dimensions are approximate. Fleetwood has designed its recreational vehicles to provide a variety of uses for customers. Each vehicle features optimal seating, sleeping, storage and fluid capacities. The user is responsible for selecting the proper combination of loads (i.e.: occupants, equipment, fluids, cargo, etc.) to ensure that the vehicle's capacities are not exceeded.
