

LET YOUR
nature shine

LET YOUR
nature shine

Perfect for exploring the world with your loved ones, the Alto willingly follows you on the road where real vacations begin. Its comfortable and well-thought-out interior provides all the necessary breathing space you need without stepping on anyone's toes. On the road, its light weight and aerodynamic shape will never slow you down. Welcome to your space to tame the open spaces.

At home
in your cocoon,
everywhere else

At home
in your cocoon,
everywhere else

Turn off your phone
and discover its
many applications

Everywhere it goes, people rave about its design, but it is the intelligence of its conception that you will appreciate most. With its retractable roof and large windows, it instantly gives you the impression of being outside, while comfortably inside. Better than on a touch screen, you will have real life at your fingertips. Wait no more! Trade your work-eat-sleep routine for the canoe-cycle-Alto lifestyle.

Only when
no details have
been overlooked
can one forget
everything

Every detail has been designed to let you enjoy the trip without any unnecessary clutter. This is how our vehicles meet the impossible challenge of being smaller outside, but larger inside! Designed by real outdoor enthusiasts and regularly field-tested, they fit everywhere. Reach the most beautiful places, seize the moment: being smaller means having the freedom to dream big.

MEIER SVEN

Voluntarily simple

Leave for a weekend or a few weeks without worrying about finding a place to sleep, planning where to eat or carrying heavy luggage. Like the snail, travel stress-free with your shelter always accessible. No need to waste time and energy planning your travels months in advance. With peace of mind, you'll have every opportunity to take advantage of what really matters.

Forget the road map and follow your instincts

Sudden urge to disappear in nature, away from your hectic and crowded everyday reality? Get away and reconnect with your natural instincts and your freedom to move around. Tucked under a tree, your Alto will remain discrete, quietly listening to the river's murmur and the rustle of the wind in the leaves. Never caught unprepared, you'll love the unexpected.

Aircraft inspired

THE ALTO
COMBINES
LIGHTWEIGHT,
AERODYNAMICS
AND DURABILITY.
YOUR CAR WILL
LOVE TAKING OFF
WITH IT.

UNDERNEATH *the Alto*

Its independent *Flexiride* suspension and very low centre of gravity provide great stability to the Alto. Its floor and frame are made of aluminium. For maximum aerodynamics, the weld-free frame supports streamlined tanks. Powerful electric brakes come as standard equipment.

A GREEN *travel trailer*

Faced with the steady increase in the price of gasoline and the social responsibility we all share to save non-renewable fossil energy, Safari Condo wanted to design ultra-light travel trailers with the lowest possible drag coefficient. Travel trailers meeting these two criteria could then be readily towed by smaller vehicles. Even more environmentally conscious, Safari Condo also wanted its materials selection to be not only lightweight but for the most part recyclable.

travel trailer

Faced with the steady increase in the price of gasoline and the social responsibility we all share to save non-renewable fossil energy, Safari Condo wanted to design ultra-light travel trailers with the lowest possible drag coefficient. Travel trailers meeting these two criteria could then be readily towed by smaller vehicles. Even more environmentally conscious, Safari Condo also wanted its materials selection to be not only lightweight but for the most part recyclable.

THE *materials*

Roof and walls are made of a sandwich-type material with a plastic honeycomb core laminated with aluminium on one side and *Alufiber* or aluminium on the other. *Alufiber* combines the lightweight of aluminium with the durability of fiberglass. The only materials used in building the Alto are those on which water has little effect such as aluminium, *Alufiber*, plastic, *Formica* and glass. Inside, the furniture consists largely of aluminium and composite materials. Rigid and ultra-light sandwich panels are integrated into the bed cushions, while the entire bed structure is made of aluminium extrusions.

R17 Series

RETRACTABLE ROOF

The Unique Technology of the Alto

A FUNCTIONAL
approach

With an exterior height of only 83,5 inches (213 cm) with the roof down, all R-series Alto models fit easily in your garage. With the roof up, they offer a very comfortable living space with an 82-inch (208 cm) interior clearance. The front dining area is usable even with the rear bed deployed. Beds, fridge, storage and toilet are all usable even with the roof down. You can create two different dining areas by simply moving the table. A model with indoor shower is available.

Beds, fridge, storage and toilet are all usable even with the roof down. You can create two different dining areas by simply moving the table. A model with indoor shower is available.

RETRACTABLE *roof*

The seamless aluminium roof is built in a single piece of curved *Alufiber*/aluminium sandwich panel. It is opened and closed by a pair of electric linear actuators. Its crescent-shaped windows are tinted tempered glass. With the retractable roof down, the aerodynamic shape of the Alto, developed in a virtual wind tunnel, creates 75% less aerodynamic drag than a traditional travel trailer. This factor, along with its lightweight, makes the Alto readily towable by most compact cars and small SUVs.

This factor, along with its lightweight, makes the Alto readily towable by most compact cars and small SUVs.

F17 Series

FIXED ROOF

FIXED
roof

The seamless aluminium roof is built in a single piece of curved *Alufiber*/aluminium sandwich panel. Its generous interior clearance provides easily accessible ample storage. It comes with a large private shower/toilet cabinet. With its exterior height of 95 inches, the F17 series Alto will fit under an 8-foot garage door. Using the streamlined shape of the R-series roof, the F17 series retains its aerodynamic properties and remains easily towable by most compact cars or small SUVs. A simpler design means a lower purchase price.

EUROPEAN *style Alto*

Imported from Europe, the double glazed panoramic acrylic windows of the F series provide both lightweight and superior insulation. The windows include a built-in combination blind/screen system. This type of window provides such a large opening that one almost forgets being inside. The front dinette, with its huge curved window, can be used even while the rear bed is deployed. In addition, by moving the table, it is possible to create a four seat dining area.

F21 Series

FIXED ROOF

MORE ALTO *to love*

Keeping the same materials and the same large windows as the F17 series, the F21 series offers a more spacious interior and more generous storage. Designed to fit 4 people comfortably, this series includes both King and Queen size beds, larger water and propane tanks, a roomier fridge and a more powerful combined heater/water heater system. The 4-seater front dining area has kept its huge curved window, and remains usable even when the rear bed is deployed. Furthermore, the table can be moved and attached to the side of the trailer to create an exterior dining area.
