Lance 1880 in Red Rock interior

Lance 1880

A traditional floorplan with uncommon features. Like all

Plenty of exterior-access storage space – large enough for a portable generator, firewood, tackle boxes – you name it.

Lance travel trailers, there's no compromise on the quality of components or workmanship in the Lance 1880. With sleeping accommodations for up to seven and all the features needed for a great vacation, it's the right RV for either just a couple, or a growing family. And a variety of options add to its versatility. Options specific to this model: front rockguard window. Universal options on inside front cover.

Lance 2281

ultra light
3675
dry weight

The Lance 1881 and Lance 2281 travel trailers are front walk-around queen bed models with similar floorplans. The Lance 2281 is about four feet longer than the 1881 to accommodate a very comfortable sofa that converts to an additional bed. In both, the large rear bath includes a roomy wardrobe and lavatory sink. And there's no shortage of storage in either one – including a large area beneath the front bed. Options for the 1881

Rear bath – looking left and straight in

Red Rock interior

Lance 2180

Twenty-one feet of comfort and convenience with sleeping for six.

Fold-up the rear bunks and there's plenty of storage for the kid's bikes or other toys – with access from a large outside door. Standard features include the six-foot double-door refrigerator and a full-length rear wardrobe. Like all Lance travel trailers, a comfortable dinette converts into a bed – with lots of storage beneath. Options specific to this model: convertible sofa/queen bed, and pull-out storage tray. Universal options on inside front cover.

ultralight
3510
dry weight

Available only in the 1881 and 2180 models is an optional convertible sofa/queen bed (option 118) – deployed using a space-saving, somersault-flip/roll-out action.

Looking back into the twin bunks and bathroom.

Low Gap

North America's #1 camper manufacturer.

For more than 45 years, Lance has been the most famous name in truck campers. And the quality and reliability that has continued to make us #1 with campers is being applied now

to our new lineup of ultralight travel trailers. You can depend on Lance, just like the tens of thousands of other satisfied Lance owners and their families before you.

The Lance factory – with more than 200 professionals working in 141,000-square-foot of custom-designed, state-of-the-art RV manufacturing and customer service facilities on a 22-acre campus in Southern California's sunny Antelope Valley.

An industry leader in RV product quality, Lance has received the RVDA's coveted DSI Quality Circle Award eight times.

One look and the quality is apparent.

Look inside a Lance and open a cabinet door. No raw wood. No sticks. No tacked-on strips to cover-up seams. It's quality not often seen in travel trailers. Tinted windows. Deluxe upholstery. Spring door retainers. Lasting Lance quality everywhere.

Affixed to each Lance trailer is the **Silver RVIA Seal** – a metallic foil insignia certifying Lance's 100% compliance with all U.S. federal and state electrical, plumbing, heating and fire safety standards established for RVs.

Quality. Fit. Finish.

How a Lance travel trailer is different – and why different is much, much better.

Super-lightweight, powder-coated chassis. ① Every Lance travel trailer superstructure is mounted on a lightweight, high-strength-engineered, powder-coated tempered steel chassis.

Torsion-bar suspension. ② Premium, heavy-duty, independent, rubber torsion-bar suspension axles with EZ-lube wheel bearings ensure a smooth ride.

.062"-wall-thickness Alodine®-coated all aluminum welded frame construction ③ with coated steel bonding plates serve as the underlying structure of every Lance for years of reliability and outdoor fun.

Solid, high-density block foam insulation is precision-cut by a computer-controlled router – leaving no voids available for possible air intrusion.

Fully laminated and insulated floor, ceiling and fiberglass walls provide incredible strength and rigidity – and insulation against both heat and cold.

EnergyStar®-rated TPO roof. ④ An incredibly tough, seamless, marine-grade, white TPO (thermoplastic polyolefin) single piece roof doesn't chalk, resists streaking, provides added insulation – and carries a manufacturer's 12-year warranty.

Solid wood Lite-Ply® cabinets are screwed together. No staples. No raw wood.

Tinted glass windows ⑤ reduce glare and reject the sun's harmful rays.

Solid aluminum exterior corner moldings ⑥ deliver additional weather protection. Other manufacturers use brittle vinyl insert strips on their exterior corners to hide their screws – which only serves to collect water underneath these strips and create corrosion.
