COLE
DAVIS

Founder, President of Keystone
National Association of RV Dealers
and 1 production RV in 1996

**Keystone RV
Company**

AN ICONIC COMPANY

When Cole Davis founded Keystone RV in 1996 his vision was clear: Build a quality RV loaded with features priced thousands less than other RVs on the market. To accomplish his goal, Cole built a strong team, focused on keeping overhead low, and empowered employees closest to the customer to make decisions. Within a few short months after opening the doors, Keystone produced its very first camper. Delivering big on quality, features and value, the public fell in love and a star was born.

As customers appetite skyrocketed, new Keystone models were added to satisfy growing customer demand. Along with this tremendous growth came the need for expanded production. To meet this need, more manufacturing plants were built and staffed. By the beginning of 2000, Keystone was leading the industry in fifth wheel and trailer sales. Today, Keystone RV Company has grown to encompass over 1 million square feet of manufacturing space with facilities in Goshen, Indiana and Pendleton, Oregon. While Keystone is no longer the small "start up" we once were, our mission has remained true to Cole's vision—"Do the job right and make sure we deliver a quality product every time."

FIFTH WHEELS

EDITION
WESTERN

In 2006, Keystone Hideout made a strategic move that today benefits Hideout customers. Experiencing "phenomenal success" in the aluminum-skinned travel trailer market, the Hideout brand added production capabilities in Pendleton Oregon in addition to its existing production capabilities in Goshen, Indiana.

Oregon production gives West Coast buyers an extreme price advantage over products produced in Indiana due to decreased freight costs. The Pendleton plant also enables the Hideout team to offer a trailer that is "Built in the west for the west"

What do we mean by "Built in the west for the west"? The Western Edition Hideout is geared to the specific needs of the west, where camping is done year round and primarily without the luxury of full hook ups to sewer, water, and electricity regularly found in campgrounds in the Midwest and the east. The Western Edition Hideout models are generally, smaller, lighter, and carry more robust features such as added insulation, larger holding tank capacities, larger propane capacity, more interior and exterior storage, and are currently pre-wired for solar, and satellite. We hope that you enjoy our affordable west coast floor plans, added features, and ease of towability with the Western Edition Hideout.
